

FIELDTEAM

Fully Inspected Equals Less Downtime

JOHN DEERE

MIDWEST
MACHINERY CO

Why Field Team?

- Maximize Up-Time
- Longer Equipment Life
- Higher Trade-In Value
- Maximize Grain and Data Quality
- Worry-Free Maintenance

Midwest Machinery's service and support plans ensure that both you and your machines are ready for the season.

Fully Inspected Equals Less Downtime.

When you become a Field Team member, you no longer have to worry about maintenance. If you commit multiple machines to Midwest Machinery for inspection, we will reward you with a very special list of benefits. Manage your operation while we maintain and optimize your equipment investment.

You can have peace of mind while taking advantage of strong performance, in addition to enjoying longer equipment life and higher trade-in value when you are ready to upgrade.

Field Team Packages

Every inspection will receive a labor credit that is good towards any of the recommended repairs. The motorized units that are eligible for extended warranty will receive a credit towards the purchase of PowerGard.

Labor and warranty credits are applicable during defined sign-up period.

Purchase Period to Receive Benefits: Nov 1 - Jan 31

Benefits Descriptions

Combine Loaner

If Midwest Machinery Co. (MMC) completed all of the recommended repairs after your inspection, and your covered combine is down for more than 24 hours, you are eligible for up to 30 free separator hours of a combine rental if you are a Silver level or higher. Any hours over 30 will only be charged at ½ MMC’s rental rate. Bronze level is eligible for a loaner at ½ MMC’s rental rate.

MMC will provide a replacement combine that is comparable in size, horsepower, and features to run your front end equipment. For equipment over ten years old, compatibility between our available combines and customer’s heads may require additional consideration.

½ Rate Trucking

Silver-level customers and above receive 50% off MMC’s standard trucking rate for machine pickup and delivery for inspections.

Waived After-Hours Fees

Because you have done your part and had your machines inspected prior to season, MMC will waive any after-hours parts or service fees on your inspected Field Team machines. We want to be there for your operation when you need us with parts and service support into the evening hours during planting and harvest.

Add-On Services

MMC wants your machines running at their optimal performance and will offer discounts at each level of commitment for any of our add-on services that are listed on the following pages.

Precision Farming Package Credit

MMC’s Precision Farming Package credits starting at Bronze level will give you a great opportunity to receive knowledgeable support and training at a great value.

John Deere Financial (No Payment, No Interest until Nov 15)

The purchase price of the Field Team Plan is eligible for NPNI until November 15, 2027. The earlier you sign up, the longer you will reap the benefits.

Field Team Add-On Services

Field Team Level Add-On Discounts:

Bronze 10%	Silver 15%	Gold 20%	Platinum 25%
------------	------------	----------	--------------

Tractors

Flat Rate Oil Change (Oil and filters not included.) **\$60**

We will change your engine oil for a flat \$60 labor fee when you have your tractor in for your Field Team inspection.

Planters

Preseason Start-Up **\$750**

Before planting season begins, a certified technician will come out and ensure that your planter is ready to hit the field. We'll also make sure you have a complete understanding of your planter's settings and operation.

Optimization **\$750**

Maximize your planter's performance with a ride along by one of our certified technicians in the field. We want to ensure your planter speed, down force, seed spacing, and section control timing is set correctly for optimal planting.

Meter Test Available

We'll run your meters on our certified test stand and calibrate them to your specific planting speed, seed population, and seed size. Our goal is to keep your skips and doubles to a minimum so you can achieve the best stand possible.

Winterization **\$350 (Up to 18 rows) | \$500 (24 rows and up)**

Having your liquid fertilizer system winterized to protect the pumps, lines, and tanks will ensure a trouble-free spring planting season. (Anti-freeze not included.)

Rate Controller **\$300**

Whether it's liquid or dry, MMC will perform a catch test to make sure your rate controller is not over or under applying product.

Sprayers

Preseason Start-Up **\$600**

A certified technician will come out and ensure that your sprayer is ready to hit the field. We'll also make sure you have a complete understanding of your sprayer's settings and operation.

Winterization (Anti-freeze not included.) **\$850**

Having your spray system winterized to protect the pumps, lines, nozzles, and tanks will ensure a trouble-free spring spraying season.

Flat Rate Oil Change (Oil and filters not included.) **\$60**

We'll change your engine oil for a flat \$60 labor fee when you have your sprayer in for your Field Team inspection.

Rate Controller **\$300**

Whether it's liquid or dry, MMC will perform a catch test to make sure your rate controller is not over or under applying product.

Combines

Preseason Start-Up **\$850**

Before harvest season begins, a certified technician will come out and ensure that your combine is ready to hit the field. We'll also make sure you have a complete understanding of your combine's settings and operation.

Optimization **\$650**

Maximize your combine's performance with a ride along by one of our certified technicians in the field. We want to ensure your combine is fine-tuned to minimize grain loss and maximize grain quality. We'll also ensure that quality data is collected and saved.

Crop Change Over **\$650**

We'll send out a certified technician to change over your heads and combine from one crop to the next. Our technician will ride along to ensure that the settings and calibrations are functioning properly.

Flat Rate Oil Change (Oil and filters not included.) **\$60**

We'll change your engine oil for a flat \$60 labor fee when you have your combine in for your Field Team inspection.

Precision Farming

Precision Farming Support Package

\$1,200*

Our Precision Farming Support package can be tailored to all customer types based on your operation's needs. We'll help maximize your precision farming investment by optimizing your capabilities, giving you better overall performance.

Package includes:

- Phone Support
- John Deere Operations Center Support
- Preseason Software Updates

*\$200 discount if customer is digitally engaged with Midwest Machinery.

Digitally Engaged: RDA capable on all machines and partnered with Midwest Machinery on Operations Center (including correct permissions).

Other Precision Services Available

On Farm Training (Up to a half day.)

\$500

Technology Optimization

\$300 per Application

(AutoPath, AutoTrac Turn Automation, Gen4 Machine Sync, or TruSet)

Active Implement Guidance Optimization

\$300 per Unit

(Steerable hitches and axles)

Boundary Mapping

Call for Quote

Our Precision Farming Support package gives you the right solution to be ready to hit the field.

Planters

Preseason Start-Up

\$750

A certified technician will come out and ensure that your planter is ready to hit the field. We'll also make sure you have a complete understanding of your planter's settings and operation.

- Verify tractor connections
- Level planter - Check tire PSI
- Test variable rate drive/ground drive
- Verify correct settings for rows and spacing
- Calibrate height sensors
- Verify speed input to monitor
- Verify vacuum operation
- Verify alarm settings for population selected
- John Deere phone app setup

Optimization

\$750

Maximize your planter's performance with a ride along by one of our certified technicians in the field. We want to ensure your planter speed, down force, seed spacing, and section control timing is set correctly for optimal planting.

- Calibration on sensors
- Verify all monitor entries
- Variable rate drive test - seed only
- Enter all measurements and offsets
- Verify all operations after hooked to tractor
- Row Command initial settings

Rate Controller

\$300

Whether it's liquid or dry, MMC will perform a catch test to make sure your rate controller is not over or under applying product.

Liquid

- Perform Configuration Test to verify everything is working correctly
- Do Nozzle Flow Check to determine minimum Flow Rate
- Perform Section Test to confirm sections are working correctly

Dry

- Implement Setup
- Product Setup
- Perform Flow Control test
- Run a spread check

Sprayers

Preseason Start-Up

\$600

A certified technician will come out and ensure that your sprayer is ready to hit the field. We'll also make sure you have a complete understanding of your sprayer's settings and operation.

- Unfold boom and check folding operation
- Check to make sure all nozzles are spraying
- Make sure all offsets for the boom are correct
- Make sure section control is operating correctly
- Calibrate boom trac
- Run a rate simulation and ensure applied rates are correct
- Set up home screens
- Add water and run through system to check for leaks

Rate Controller

\$300

Whether it's liquid or dry, MMC will perform a catch test to make sure your rate controller is not over or under applying product.

Liquid

- Perform Configuration Test to verify everything is working correctly
- Do Nozzle Flow Check to determine minimum Flow Rate
- Perform Section Test to confirm sections are working correctly

Dry

- Implement Setup
- Product Setup
- Perform Flow Control test
- Run a spread check

Combines

Preseason Start-Up

\$850

A certified technician will come out and ensure that your combine is ready to hit the field. We'll also make sure you have a complete understanding of your combine's settings and operation.

- Adjust feederhouse drum and drive chain for desired crop
- Make sure feederhouse speeds up and slows down (if applicable)
- Set recommended feederhouse speed for desired crop
- Verify correct concaves are in for desired crop
- Set recommended rotor speed for desired crop
- Set strawchopper knives and speed set to desired crop
- Verify chopper deflector door is in correct position
- Check re-thresher setting (if applicable)
- Set front feed accelerator for desired speed for crop
- Make sure yield monitor is set for desired crop, implement width, etc.
- Make sure grain sump covers are installed
- John Deere phone app setup

Optimization

\$650

Maximize your combine's performance with a ride along by one of our certified technicians in the field. We want to ensure that your combine is fine-tuned to minimize grain loss and maximize grain quality. We'll also ensure that quality data is collected and saved or transmitted wirelessly.

- Make sure moisture sensor is working
- Field adjust threshing for the best grain sample
- Calibrate grain loss monitor
- John Deere phone app setup

Crop Change Over

\$650

We will send out a certified technician to change over your heads and combine from one crop to the next. Our technician will ride along to make sure that the settings and calibrations are functioning properly.

- Adjust feederhouse drum and drive chain for desired crop
- Make sure feederhouse speeds up and slows down (if applicable)
- Set recommended feederhouse speed for desired crop
- Verify correct concaves are in for desired crop
- Set recommended rotor speed for desired crop
- Set strawchopper knives and speed set to desired crop
- Verify chopper deflector door is in correct position
- Check re-thresher setting (if applicable)
- Set front feed accelerator for desired speed for crop
- Make sure yield monitor is set for desired crop, implement width, etc.
- Make sure grain sump covers are installed
- John Deere phone app setup

Self-Propelled Forage Harvesters

Remote Preseason Start-Up

\$250*

Ensure that your chopper is ready to hit the field, without any trip fees! Over the phone, our service team can talk you through the complete setup and operation of your machine.

Let us walk you step-by-step through the cab functions and controls of your machine.

Harvest Lab Sensor Remote Preseason Start-Up

\$250*

Let us help you configure your Harvest Lab sensor so your collected data this season is accurate. Without any trip fees, we can walk you through the entire setup of your Harvest Lab sensor over the phone.

With tools like Remote Display access, our service team can view your display and talk you through any adjustment.

*Up to one hour over the phone.

Bulk Oil & DEF Program

Midwest Machinery Bulk Oil and DEF Programs provide the ultimate convenience and savings.

Bulk Oil and DEF Program Benefits

- Convenience: Free on-site delivery
- Cost Savings: Lower cost per gallon compared to buckets or drums
- Extended Equipment Life: John Deere oils are developed by John Deere engineers for the highest quality products
- Environmentally Friendly: Less waste and disposal issues

Talk with us today about converting to a Bulk Oil and DEF System!

Midwest Machinery Co. is a committed Ag, Turf, and Commercial dealership with a passion to assist our customer base with our products, knowledge, and support.

We progressively train our employees and our customers on the leading technologies in our industry to deliver the highest value with integrity at our highest ability.
