Gen4 - Creating Run Page Sets

How to create a Run Page Set on a Gen4 display as well as how to change the active set. These can be created for each part of the growing season.

Create ALL run pages that Operator would like to include in the set in the "All Run Pages" section

3 Once all run pages have been created, go back to the "Run Page Sets" section

2

4 Select "Create New Set" at the bottom of the screen

5 Name the Run Page Set

	4640 Universal Display
Enter Run Page Set Name	
Plant	
1234 qwer asdf	5 6 7 8 9 0 - t y u i o p / ? g h j k l : ! ~
a A Z X C #+=%	v b n m , . X Cancel V OK

Made with Scribe - https://scribehow.com

Select a Shortcut Bar to go with the Run Page Set.

6

(!)

Shortcut bars can be copied and customized as desired. Ex. For a planting run page set, Operator may add planter functions like the SeedStar app and the section control master to the shortcut bar.

7

(!)

8

Select "Include Additional Run Pages" and add all the run pages Operator previously created and would like to include for the selected set

Name:	Planter 🥒
Shortcut Bar:	Planter
	Include additional Run Pages to this Set

Example of Step 7: For a SeedStar4 planter, Operator would likely add the Planter Details page, a Planter Summary page, and a Guidance page

Once all run pages have been added to the set, select "Save." Once saved, the set is created

Changing Active Set

To Change the Active Set, select "Change Active Set" under the Run Page Sets section

10 Select the white bar next to "Active Set:"

9

11 Select the Run Page set Operator would like to enable

Select Run	Page Set
1	Default Run Pages 5 Run Page(s)
	Planter 3 Run Page(s)
_	🗙 Cancel 🗸 OK

12 Select "Ok"

Select Run I	Page Set
1	Default Run Pages 5 Run Page(s)
Ų	Planter 3 Run Page(s)
	🗙 Cancel 🗸 ок

13 After selecting Ok, the selected run page set has been enabled. Operator may exit out of the Main Menu and back to the run pages.
